## Hoverboard Safety Alert

Since September 2015, CPSC has warned the public about the dangers posed by hoverboards. CPSC is aware of more than 300 self-balancing scooter/hoverboard incidents related to fires or overheating. In March 2017, a 2-year-old girl and her 10-year-old sister died in a house fire ignited by a hoverboard in Harrisburg, Pennsylvania. In addition, CPSC has reports of burn injuries, smoke inhalation injuries and millions of dollars in property damage related to hoverboards.

**CPSC recommends that consumers who own or use hoverboards take these steps to reduce the risk of fire:**

- Use only chargers supplied with the hoverboard.
- Only charge a hoverboard when you are there to watch it. Do not charge an unattended hoverboard, especially overnight.
- Keep away from flammable items while charging or even storing your hoverboard.
- Check for recalls. Go to [www.CPSC.gov](http://www.CPSC.gov) to see if the hoverboard has been recalled. Stop using a recalled hoverboard immediately.
- Have working smoke alarms and fire extinguishers on every level of your home, outside sleeping areas, and inside each bedroom.
- Report incidents involving hoverboards overheating, smoking, or catching fire to CPSC at [www.Saferproducts.gov](http://www.Saferproducts.gov).
- Hoverboards should be compliant with the UL 2272 safety standard. However, even UL 2272 compliance cannot guarantee that a hoverboard will not overheat or catch fire.

### How can you tell if your hoverboard is UL 2272 compliant?

- Look for a certification mark for self-balancing scooters or personal e-Mobility on the packaging and on the product. These labels are your indication that you have a UL 2272 compliant product.
- Any third party certification body that is accredited for UL 2272 product certification is acceptable to confirm [compliance](#).

# CPSC Safety Alert

- If you purchased your hoverboard before January 29, 2016, then your hoverboard is not UL 2272 compliant.
- Buy from a reputable source. If the price seems significantly lower than the cost of other hoverboards, the unit may not be UL 2272 compliant.
- Never purchase a hoverboard from a kiosk, a secondhand seller, or an online retailer without proof that the hoverboard is compliant with the UL 2272 safety standard.
- Many sellers/retailers claim to have UL-compliant battery packs, chargers or other components, but this does not mean they are UL 2272 compliant. UL 2272 covers the entire hoverboard unit, not just individual parts.
- If you are still unsure if the hoverboard is UL 2272 compliant, ask questions. Ask the seller/retailer to provide you with documentation of compliance with UL 2272 for the product.
